

TKFC RABBIT PAB

Cat.#: S218573

Product Name: Anti-TKFC Rabbit Polyclonal Antibody

Synonyms: DAK; NET45

UNIPROT ID: Q3LXA3 (Gene Accession - BC001341)

Background: This gene is a member of the family of dihydroxyacetone kinases, which have a protein structure distinct from other kinases. The product of this gene phosphorylates dihydroxyacetone, and also catalyzes the formation of riboflavin 4',5'-phosphate (aka cyclin FMN) from FAD. Several alternatively spliced transcript variants have been identified, but the full-length nature of only one has been determined.
