

TM4SF1 RABBIT PAB

Cat.#: S220995

Product Name: Anti-TM4SF1 Rabbit Polyclonal Antibody

Synonyms: L6; H-L6; M3S1; TAAL6

UNIPROT ID: P30408 (Gene Accession - NP_055035)

Background: The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface antigen and is highly expressed in different carcinomas.

Immunogen: Synthetic peptide of human TM4SF1

Applications: ELISA, IHC

Recommended Dilutions: IHC: 25-100; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Cancer

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 220995 (TM4SF1 Antibody) at a dilution of 1/25 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 220995 (Anti-TM4SF1 Antibody) at dilution 1/25.

The image on the left is immunohistochemistry of paraffin-embedded Human prostate cancer tissue using 220995 (Anti-TM4SF1 Antibody) at a dilution of 1/25.

In comparison with the IHC on the left, the same paraffin-embedded Human prostate cancer tissue is first treated with synthetic peptide and then with D262334 (Anti-TM4SF1 Antibody) at dilution 1/25.
