

TPP2 RABBIT PAB

Cat.#: S219583

Product Name: Anti-TPP2 Rabbit Polyclonal Antibody

Synonyms: IMD78; TPP-2; TPPII; TPP-II

UNIPROT ID: P29144 (Gene Accession - BC039905)

Background: This gene encodes a mammalian peptidase that, at neutral pH, removes tripeptides from the N terminus of longer peptides. The protein has a specialized function that is essential for some MHC class I antigen presentation. The protein is a high molecular mass serine exopeptidase; the amino acid sequence surrounding the serine residue at the active site is similar to the peptidases of the subtilisin class rather than the trypsin class.

Immunogen: Fusion protein of human TPP2

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 5000-10000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Immunology, Cell Biology

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin-embedded Human breast cancer tissue using 219583(TPP2 Antibody) at a dilution of 1/55(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with the fusion protein and then with 219583(Anti-TPP2 Antibody) at dilution 1/55.

The image on the left is immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using 219583(Anti-TPP2 Antibody) at a dilution of 1/55.

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with fusion protein and then with D227845(Anti-TPP2 Antibody) at dilution 1/55.
