

TRPM7 RABBIT PAB

Cat.#: S220239

Product Name: Anti-TRPM7 Rabbit Polyclonal Antibody

Synonyms: CHAK; CHAK1; ALSPDC; LTRPC7; TRP-PLIK

UNIPROT ID: Q96QT4 (Gene Accession - NP_060142)

Background: The protein encoded by this gene is both an ion channel and a serine/threonine protein kinase. The kinase activity is essential for the ion channel function, which serves to increase intracellular calcium levels and to help regulate magnesium ion homeostasis. Defects in this gene are a cause of amyotrophic lateral sclerosis-parkinsonism/dementia complex of Guam.

Immunogen: Synthetic peptide of human TRPM7

Applications: ELISA, IHC

Recommended Dilutions: IHC: 50-200; ELISA: 2000-5000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Neuroscience

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human gastric cancer tissue using 220239 (TRPM7 Antibody) at a dilution of 1/30 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with the synthetic peptide and then with 220239 (Anti-TRPM7 Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using 220239 (Anti-TRPM7 Antibody) at a dilution of 1/30.

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with synthetic peptide and then with D261183 (Anti-TRPM7 Antibody) at dilution 1/30.
