

## VASP RABBIT MAB

**Cat.#:** N263061

**Product Name:** Anti-VASP Rabbit Monoclonal Antibody

**Synonyms:** Vasodilator-stimulated phosphoprotein

**UNIPROT ID:** P50552

**Background:** VASP (vasodilator-stimulated phosphoprotein), is involved in the maintenance of cytoarchitecture by interacting with actin-like filaments. VASP shares a limited degree of homology with the amino terminus of WASP, which is frequently mutated in WAS patients. An established substrate of cAMP and cGMP dependent kinases, VASP is phosphorylated on a regulatory serine residue 157 and localizes to focal adhesions, microfilaments and highly active regions of the plasma membrane.
