

VIPR1 RABBIT PAB

Cat.#: S221103

Product Name: Anti-VIPR1 Rabbit Polyclonal Antibody

Synonyms: II; HVRI; RDC1; VIRG; VIPR; VIRG; VAPC1; VPAC1; VPAC1R; VIP-R-1; VPCAP1R; PACAP-R2; PACAP-R-2

UNIPROT ID: P32241 (Gene Accession - NP_004615)

Background: This gene encodes a receptor for vasoactive intestinal peptide, a small neuropeptide. Vasoactive intestinal peptide is involved in smooth muscle relaxation, exocrine and endocrine secretion, and water and ion flux in lung and intestinal epithelia. Its actions are effected through integral membrane receptors associated with a guanine nucleotide binding protein which activates adenylate cyclase. Several transcript variants encoding different isoforms have been found for this gene.

Immunogen: Synthetic peptide of human VIPR1

Applications: ELISA, IHC

Recommended Dilutions: IHC: Oct-50; ELISA: 1000-2000

Host Species: Rabbit

Clonality: Rabbit Polyclonal

Isotype: Immunogen-specific rabbit IgG

Purification: Antigen affinity purification

Species Reactivity: Human, Mouse, Rat

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

Research Areas: Signal Transduction, Neuroscience, Cardiovascular

Storage & Shipping: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 221103 (VIPRI Antibody) at a dilution of 1/20 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 221103 (Anti-VIPRI Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using 221103 (Anti-VIPRI Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with synthetic peptide and then with D262478 (Anti-VIPRI Antibody) at dilution 1/20.
