

ARF1 MAB

Arf1 Monoclonal Antibody

Cat. #: 26019

Gene Symbol: ARF1

Description: Anti-Arf1 Mouse Monoclonal Antibody

Background: ARF1 (ADP-ribosylation factor 1) is a member of the ARF super-family. ARF genes encode small GTPases that increase the ADP-ribosyltransferase activity of cholera toxin and are critical for vesicular trafficking as activators of phospholipase D. ARF1 protein is localized to the Golgi apparatus and has a central role in intra-Golgi transport.
