

## **Product Description**

Pioneering GTPase and Oncogene Product Development since 2010

## **BIOTINYLATED ANTI-CD40 (DM102) RABBIT MAB**

Cat.#: 28447

Product Name: Biotinylated Anti-CD40(DM102) Rabbit Monoclonal Antibody

**Synonyms:** CD40; Bp50; CDW40; MGC9013; TNFRSF5; p50

**Description:** Biotinylated Anti-CD40 antibody(DM102) Rabbit Monoclonal

**Antibody** 

**Background:** This gene is a member of the TNF-receptor superfamily. The encoded protein is a receptor on antigen-presenting cells of the immune system and is essential for mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching; memory B cell development; and germinal center formation. AThook transcription factor AKNA is reported to coordinately regulate the expression of this receptor and its ligand; which may be important for homotypic cell interactions. Adaptor protein TNFR2 interacts with this receptor and serves as a mediator of the signal transduction. The interaction of this receptor and its ligand is found to be necessary for amyloid-beta-induced microglial activation; and thus is thought to be an early event in Alzheimer disease pathogenesis. Mutations affecting this gene are the cause of autosomal recessive hyper-IgM immunodeficiency type 3 (HIGM3). Multiple alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported.

**Applications:** ELISA; Flow Cyt

Recommended Dilutions: ELISA 1:5000-10000; Flow Cyt 1:100

Host Species: Rabbit Isotype: Rabbit IgG

Purification: Purified from cell culture supernatant by affinity

chromatography

**Species Reactivity:** Human CD40

**Constituents:** Lyophilized from sterile PBS, pH 7.4. 5 % – 8% trehalose is

added as protectants before lyophilization.

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
