

## HUMAN CX3CR1 FULL LENGTH PROTEIN

**Cat.#:** 11096

**Product Name:** Human CX3CR1 Full Length Protein

**Size:** 10 µg; 50 µg and 100 µg

**Synonyms:** CCRL1; CMKBRL1; CMKDRI; GPR13; GPRV28; V28

**Target:** CX3CR1

**UNIPROT ID:** P49238

**Description:** Human CX3CR1 Full Length Protein-Synthetic Nanodisc

**Background:** Fractalkine is a transmembrane protein and chemokine involved in the adhesion and migration of leukocytes. The protein encoded by this gene is a receptor for fractalkine. The encoded protein also is a coreceptor for HIV-1, and some variations in this gene lead to increased susceptibility to HIV-1 infection and rapid progression to AIDS.

**Species/Host:** HEK293

**Molecular Weight:** The human full length CX3CR1 protein has a MW of 40.4 kDa

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

**Protein Families:** Druggable Genome, GPCR, Transmembrane

**Protein Pathways:** Chemokine signaling pathway, Cytokine-cytokine receptor interaction

### ELISA assay to evaluate CX3CR1-Nanodisc 0.2µg Human CX3CR1-Nanodisc per well

Figure 1. Elisa plates were pre-coated with Flag Tag CX3CR1-Nanodisc (0.2µg/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with CX3CR1-Nanodisc is 2.796ng/ml.
