

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

DII-HDL

Catalog

10461

Number: Size:

0.5 mg

Purity:

98% (Co-migrates with reference on agarose gel

electrophoresis)

Concentration: Minimum 1.6 mg/ml protein

Human HDL (Cat. # 10460) is labeled with Dil (1,1'dioctadecyl-3,3,3',3'-tetramethylindocarbocyanine

perchlorate, and then isolated by ultracentrifugation. The

resultant product is exhaustively dialyzed against

Background: phosphate buffered saline, (pH 7.4), sterilized by membrane

filtration and then aseptically packaged in a solution

containing phosphate-buffered saline at pH 7.4 and 0.2 mM EDTA. Each lot is evaluated on a murine macrophage cell

line for fluorescence uptake.

Human Dil-HDL is stable for 6 weeks after receipt when handled aseptically and stored at 2-8°C (Don't Freeze). Note: After prolonged storage, some precipitate may be

Storage & **Stability:**

observed. This is normal for the product. Spin in

centrifugation at 1000×g for 3 minutes before using.

Lead Time

The product requires I week lead time. Please plan your

experiments in advance and use the fresh material.
