

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

HUMAN GPR132 FULL LENGTH PROTEIN

Cat.#: 11097 Product Name: Human GPR132 Full Length Protein Size: 10 µg, 50 µg and 100 µg Synonyms: G2A Target: GPR132 UNIPROT ID: Q9UNW8

Description: Human GPR132 full length protein-synthetic nanodisc

Background: This gene encodes a member of the guanine nucleotidebinding protein (G protein)-coupled receptor (GPCR) superfamily. The receptors are seven-pass transmembrane proteins that respond to extracellular cues and activate intracellular signal transduction pathways. This protein was reported to be a receptor for lysophosphatidylcholine action, but PubMedID: 15653487 retracts this finding and instead suggests this protein to be an effector of lysophosphatidylcholine action. This protein may have proton-sensing activity and may be a receptor for oxidized free fatty acids. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013]

Species/Host: HEK293

Molecular Weight: The human full length GPR132 protein has a MW of 42.5 kDa

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
