

HUMAN 2B4 PROTEIN, HFC TAG

Cat.#: 11287

Product Name: Human 2B4 Protein

Size: 10 µg, 50 µg and 100 µg

Synonyms: CD244;2B4;SLAMF4;NKR2B4;NAIL;h2B4

Target: 2B4

UNIPROT ID: Q9BZW8

Description: Recombinant human 2B4 protein with C-terminal human Fc tag

Background: This gene encodes a cell surface receptor expressed on natural killer (NK) cells (and some T cells) that mediate non-major histocompatibility complex (MHC) restricted killing. The interaction between NK-cell and target cells via this receptor is thought to modulate NK-cell cytolytic activity. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Species/Host: HEK293

Molecular Weight: The protein has a predicted molecular mass of 47.7 kDa after removal of the signal peptide.

Molecular Characterization: 2B4(Cys22-Ala221) hFc(Glu99-Ala330)

Purity: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
