

HUMAN ANXA1 PROTEIN, HIS TAG**Cat.#:** 11548**Product Name:** Human ANXA1 Protein**Size:** 10 µg, 50 µg and 100 µg**Synonyms:** Annexin A1;p35;ANX1;LPC1**Target:** ANXA1**UNIPROT ID:** P04083**Description:** Recombinant human ANXA1 Protein with C-terminal 6xHis tag**Background:** This gene encodes a membrane-localized protein that binds phospholipids. This protein inhibits phospholipase A2 and has anti-inflammatory activity. Loss of function or expression of this gene has been detected in multiple tumors. [provided by RefSeq, Dec 2014]**Species/Host:** HEK293**Molecular Weight:** The protein has a predicted molecular mass of 39.4 kDa after removal of the signal peptide. The apparent molecular mass of ANXA1-His is approximately 35-40 kDa due to glycosylation.**Molecular Characterization:** ANXA1(Ala2-Asn346) 6×His tag**Purity:** The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
