

## HUMAN CD34 PROTEIN, HIS TAG

**Cat.#:** 11280

**Product Name:** Human CD34 Protein

**Size:** 10 µg, 50 µg and 100 µg

**Synonyms:** CD34 Molecule

**Target:** CD34

**UNIPROT ID:** P28906

**Description:** Recombinant human CD34 protein with C-terminal 6xHis tag

**Background:** The protein encoded by this gene may play a role in the attachment of stem cells to the bone marrow extracellular matrix or to stromal cells. This single-pass membrane protein is highly glycosylated and phosphorylated by protein kinase C. Two transcript variants encoding different isoforms have been found for this gene.

**Species/Host:** HEK293

**Molecular Weight:** The protein has a predicted molecular mass of 28.3 kDa after removal of the signal peptide.

**Molecular Characterization:** CD34(Ser32–Thr290) 6×His tag

**Purity:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
