HUMAN CXCL6 (C-6HIS) PROTEIN

Cat.#: 12096

Product Name: Human CXCL6 (C-6His) Protein

Size : 10 µg, 50 µg and 100 µg

Synonyms: C-X-C Motif Chemokine 6;Chemokine Alpha 3;CKA-3;Granulocyte Chemotactic Protein 2;GCP-2;Small-Inducible Cytokine B6;CXCL6;GCP2;SCYB6

Target: CXCL6

UNIPROT ID: P80162

Description: Recombinant Human C-X-C Motif Chemokine 6 is produced by our Mammalian expression system and the target gene encoding Gly38-Asn114 is expressed with a 6His tag at the C-terminus.

Background: Chemokine (C-X-C-Motif) Ligand 6 (CXCL6) is a small cytokine belonging to the CXC chemokine family. It is a potent neutrophil chemotactic and activating factor and it exhibits extensive similarity to other CXC chemokines such as IL-8 and ENA-78. CXCL6 can promote the release of MMP-9 from granulocytes indicating its potential role as an inflammatory mediator. It functionally uses both of the IL-8/CXCL8 receptors to chemoattract neutrophils but that is structurally most related to epithelial cell-derived neutrophil attractant-78 (ENA-78)/CXCL5. The human CXCL6 gene has been cloned and is physically mapped to the CXC chemokine locus on chromosome 4. Mature human CXCL6 is a 75 amino acid (aa) protein with a predicted molecular weight of approximately 8 kDa. Human CXCL6 shares 60% and 67% aa identity with mouse and bovine CXCL6, respectively.

Species/Host: HEK293

Molecular Weight: 9.35 KDa

Molecular Characterization: Not available

Purity: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
