

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

HUMAN LIV-1 PROTEIN, HIS TAG

Cat.#: 11547

Product Name: Human LIV-1 Protein

Size: 10 μg, 50 μg and 100 μg **Synonyms:** LIV1;SLC39A6;ZIP-6

Target: LIV-1

UNIPROT ID: Q13433

Description: Recombinant human LIV-1 Protein with C-terminal 6xHis tag

Background: Zinc is an essential cofactor for hundreds of enzymes. It is involved in protein, nucleic acid, carbohydrate, and lipid metabolism, as well as in the control of gene transcription, growth, development, and differentiation. SLC39A6 belongs to a subfamily of proteins that show structural characteristics of zinc transporters (Taylor and Nicholson, 2003 [PubMed 12659941]).[supplied by OMIM, Mar 2008]

Species/Host: HEK293

Molecular Weight: The protein has a predicted molecular mass of 34.4 kDa after removal of the signal peptide. The apparent molecular mass of LIV-1-His is approximately 55-70 kDa due to glycosylation.

Molecular Characterization: LIV-1(Phe29-Trp325) 6×His tag

Purity: The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
