

**HUMAN NCR1 PROTEIN, HFC TAG**

**Cat.#:** 11630

**Product Name:** Human NCR1 Protein

**Size:** 10 µg, 50 µg and 100 µg

**Synonyms:** CD335;LY94;NK-p46;NKP46

**Target:** NCR1

**UNIPROT ID:** O76036

**Description:** Recombinant Human NCR1 with C-terminal human Fc tag

**Background:** Cytotoxicity-activating receptor that may contribute to the increased efficiency of activated natural killer (NK) cells to mediate tumor cell lysis.[UniProtKB/Swiss-Prot Function]

**Species/Host:** HEK293

**Molecular Weight:** The protein has a predicted molecular mass of 52.5 kDa after removal of the signal peptide. The apparent molecular mass of NCR1-hFc is approximately 55–70 kDa due to glycosylation.

**Molecular Characterization:** NCR1(Gln22–Asn254) hFc(Glu99–Ala330)

**Purity:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**Storage & Shipping:** Store at –20°C to –80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at –80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
