

HUMAN PDL2 PROTEIN, HIS TAG

Cat.#: 11320

Product Name: Human PDL2 Protein

Size: 10 µg, 50 µg and 100 µg

Synonyms: B7DC;bA574F11.2;Btdc;CD273;PD-L2;PDCD1L2;PDL2

Target: PDL2

UNIPROT ID: Q9BQ51

Description: Recombinant human PDL2 protein with C-terminal 6xHis tag

Background: Involved in the costimulatory signal, essential for T-cell proliferation and IFNG production in a PDCD1-independent manner. Interaction with PDCD1 inhibits T-cell proliferation by blocking cell cycle progression and cytokine production (By similarity).[UniProtKB/Swiss-Prot Function]

Species/Host: HEK293

Molecular Weight: The protein has a predicted molecular mass of 23.4 kDa after removal of the signal peptide. The apparent molecular mass of PDL2-His is approximately 35-55 kDa due to glycosylation.

Molecular Characterization: PDL2(Leu20-Pro219) 6×His tag

Purity: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Figure 1. Human PDL2 Protein, His Tag on SDS-PAGE under reducing condition.

Figure 2. Flow cytometry analysis with 15 µg/ml Human PDL2 Protein, His tag (11320) on Expi293 cells transfected with human PD1 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
