

## HUMAN PF4V1 PROTEIN, HFC TAG

**Cat.#:** 11938

**Product Name:** Human PF4V1 Protein

**Size:** 10 µg, 50 µg and 100 µg

**Synonyms:** CXCL4L1;CXCL4V1;PF4-ALT;PF4A;SCYB4V1

**Target:** PF4V1

**UNIPROT ID:** P10720

**Description:** Recombinant Human PF4V1 Protein with C-terminal human Fc tag

**Background:** The protein encoded by this gene is a chemokine that is highly similar to platelet factor 4. The encoded protein displays a strong antiangiogenic function and is regulated by chemokine (C-X-C motif) receptor 3. This protein also impairs tumor growth and can protect against blood-retinal barrier breakdown in diabetes patients. [provided by RefSeq, Nov 2015]

**Species/Host:** HEK293

**Molecular Weight:** The protein has a predicted molecular mass of 34.4 kDa after removal of the signal peptide. The apparent molecular mass of PF4V1-hFc is approximately 25-35 kDa due to glycosylation.

**Molecular Characterization:** PF4V1(Phe31-Ser104) hFc(Glu99-Ala330)

**Purity:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
