Pioneering GTPase and Oncogene Product Development since 2010

HUMAN PIP PROTEIN

Cat.#: 12257

Product Name: Human PIP Protein

Size: 10 μg, 50 μg and 100 μg

Synonyms: GPIP4;BRST-2;GCDFP15;GCDFP-15

Target: PIP

UNIPROT ID: P12273

Description: Recombinant human PIP Protein with C-terminal human Fc tag

Background: Enables IgG binding activity; aspartic-type endopeptidase activity; and identical protein binding activity. Involved in several processes, including detection of chemical stimulus involved in sensory perception of bitter taste; negative regulation of T cell apoptotic process; and proteolysis. Located in extracellular space and nucleus. [provided by Alliance of Genome Resources, Apr 2022]

Species/Host: HEK293

Molecular Weight: The protein has a predicted molecular mass of 39.7 kDa after removal of the signal peptide. The apparent molecular mass of PIPhFc is approximately 35-55 kDa due to glycosylation.

Molecular Characterization: PIP(GIn29-Glu146) hFc(Glu99-Ala330)

Purity: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
