

ANTI-MOUSE IGG1 FC NANOBODY

Anti-Mouse IgG1 Nanobody

Cat. #: 26403

Size: 100 μ L

Target: IgG1

Description: Anti-Mouse IgG1 Nanobody

Background: Mouse IgG1 FC refers to the Fc fragment of mouse IgG1, and Anti-Mouse IgG1 Fc nanobody specifically recognizes and binds to the Fc fragment of mouse IgG1. This kind of nanobody has the advantages of small molecular weight, high stability, and easy modification. It can achieve efficient and specific recognition and binding of target molecules, and is suitable for all immune reactions in which the primary antibody is a mouse antibody.

Applications: FACS, Elisa, IP, Co-IP, IHC

Dilution: 1:500

Molecular Weight: 15 kD

Format: Liquid

Clonality: Monoclonal

Tag: His, Myc

Constituents: PBS, 40% Glycerol, 0.03% proclin300

Species: Mouse

Storage Conditions: Store at 4 \times , 6 months; -20 \times , 2 years

ELISA Anti-Mouse IgG1 Fc antibody at 1/500 dilution :
