RHOA PROTEIN

RhoA Protein

Cat.#: 10104
Product Name: RhoA Protein
Synonyms: Ras homolog gene family, member A, ARHA, ARH12, RHO12, RHOH12
Source: Human, recombinant full length, His6-tag
Expression Host Species: E. coli
Molecular Weight: 22 kDa
Purity: >96% by SDS-PAGE
Introduction: Small GTPases are a super-family of cellular signaling regulators. RhoA belongs to the Rho sub-family of GTPases. Rho proteins play critical roles in many actin cytoskeleton- dependent processes including platelet aggregation, cell motility, contraction, and cytokinesis. It regulates the formation of stress fibers and focal adhesions in fibroblasts and Ca2+ sensitivity of smooth muscle contraction.
Amino Acid Sequence (1-193)

Properties
Physical Appearance (form): Dissolved in 20mM Tris-HCl, pH8.0, 150mM NaCl.
Physical Appearance (form): White or clear
Concentration: 1 mg/mL
Storage: -80°C
Preparation Instructions:
Centrifuge the vial before open the cap and reconstitute in water. Adding of 10 mM β-mercaptoethanol or 1 mM DTT into the solution to protect the protein is recommended and using of non-ionic detergents such as n-Dodecyl β-D-maltoside (DoDM) or polyethylene detergents (e.g. C12E10) also help to stabilize the protein. Avoid repeated freezing and thawing after reconstitution. The purity of His-tagged RhoA was determined by SDS- PAGE and Coomassie Brilliant Blue Staining.
