

**SARS-COV-2 (2019-NCOV) S1 PROTEIN NTD, HIS TAG****Cat.#:** 11297**Product Name:** SARS-CoV-2 (2019-NCoV) S1 Protein NTD**Size:** 10 µg, 50 µg and 100 µg**Synonyms:** S1 protein NTD;pike protein S1 NTD;etaCoV S1-NTD;OVID-19**Target:** S1 protein NTD**UNIPROT ID:** P0DTC2**Description:** Recombinant SARS-CoV-2 (2019-nCoV) S1 protein NTD with C-terminal 6xHis tag**Background:** SARS-CoV-2 (Severe Acute Respiratory Syndrome Coronavirus 2) also known as Covid19 (2019 Novel Coronavirus) is a virus that causes illnesses ranging from the common cold to severe diseases. The spike protein is a type I transmembrane protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which accounts for recognizing the cell surface receptor, ACE2. S2 contains basic elements needed for the membrane fusion. Recent publications indicate that S1-RBD domain can induce virus neutralizing-antibody and T cell response.**Species/Host:** HEK293**Molecular Weight:** The protein has a predicted molecular mass of 33.7 kDa after removal of the signal peptide. The apparent molecular mass of S1-NTD-His is approximately 55 kDa due to glycosylation.**Molecular Characterization:** S1 protein NTD(Ser13-Leu303) 6×His tag**Purity:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.**Formulation & Reconstitution:** Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.**Storage & Shipping:** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
